Subject: RE: USG NOV EPA-5-15-MN-03 Meeting Request

Daniel-

As you know, USG has hired an environmental consultant with air dispersion modeling expertise to help us address the issues raised in the EPA's NOV. We would like to review and develop an understanding of the modeling work that the EPA has done in advance of our February 10th meeting. Will you please provide us with the modeling input and output files, including the input file provided by the MPCA that you referenced, as well as any other modeling data, results, or analysis?

I have copied our attorney Matthew Cohn and EPA attorney John Matson in case it is the EPA's position that there is a legal basis for holding back the modeling data and information requested. You or Mr. Matson may respond to both Mr. Cohn and me on this issue.

Thank you.

Respectfully,

Greg Kinser

Mike,

Your proposed conference date of February 10th works for us. Please provide an arrival/duration time when you have one.

Also, regarding the modeling files, EPA used the input file provided by MPCA with the stack data provided in your recent response to our information request. The model was run for the 1-hour average as opposed to the old 3-hour, 24-hour, and annual averages.

Thanks.
